Nice To Meet You!

At Srijbosch Acrylics Unlimited (SAU), we are passionate about turning your visions into reality. With over 30 years of experience, we specialize in creating custom financial tombstones, deal toys, awards, and business gifts. Our Amsterdam-based team combines traditional craftsmanship with modern techniques to deliver high-quality, personalized products. We pride ourselves on our innovative approach, attention to detail, and commitment to sustainability. Whether you're celebrating a significant achievement or looking to strengthen your brand, SAU is your trusted partner in creating memorable, lasting impressions.

Disciplines | Acrylic Casting

At SAU, acrylic casting is our most unique and standout service. As one of the few companies mastering this technique, we specialize in clear cast acrylic, perfect for encapsulating financial deals and creating memorable products.

Our skilled team crafts custom pieces that reflect your brand's style, ensuring durability and clarity for years to come. From custom brand products to embedding supplied objects, our high-quality acrylic castings are trusted by businesses and individuals worldwide. Choose SAU for unparalleled excellence in acrylic casting.

DISCIPLINES

Disciplines | Packaging

Enhance the presentation of your award with our custom packaging service. We offer tailored solutions to ensure your awards are not only protected but also beautifully presented. From elegant boxes to branded packaging, we customize every detail to reflect your brand's identity and elevate the recipient's experience. Make your awards truly memorable with our bespoke packaging options.

Disciplines | In-House Production

Lathe Turning

Lathe turning precisely shapes acrylic, wood, and aluminum into various designs, especially cylinder-based ones. Using different cutting tools, it creates both rough and fine finishes. This efficient process produces large quantities of identical parts quickly.

Laser Cutting

Laser cutting is a versatile technology that uses a high-powered laser beam to cut materials, including recyclable acrylic, aluminium and wood.

DISCIPLINES

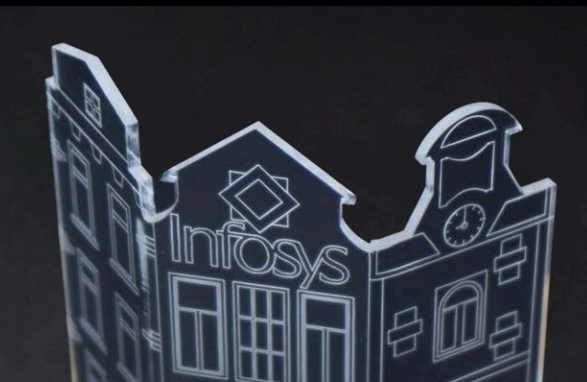

Laser Engraving

Laser engraving is a unique method for creating awards because it offers high precision and detailed designs, allowing for customization. It works on a wide range of materials like metal, glass, and wood. Additionally, laser engraving is permanent and resistant to wear, ensuring long-lasting quality.

Full Color UV Printing

With the ability to UV print In Full Color on surfaces up to 150mm high, we can handle a wide range of materials and applications, including printing on thicker objects such as acrylic blocks, wood panels, and bamboo blocks and metal plaques.

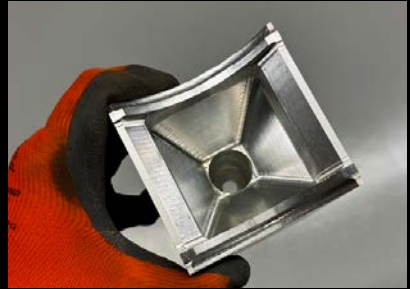

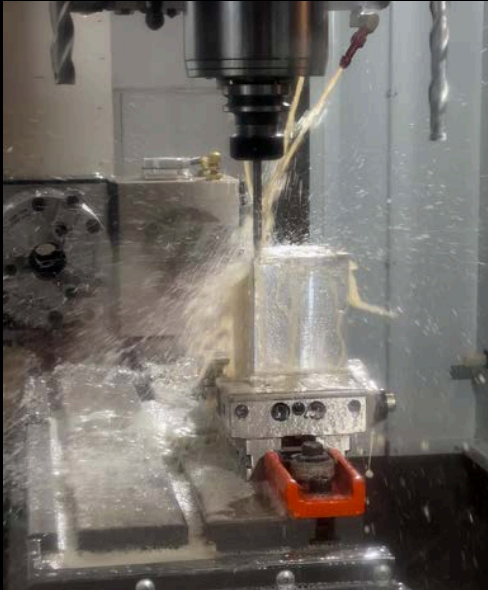

Acrylic Heat Bending

Acrylic heat bending allows us to create curves, angles, and custom shapes from acrylic sheets. We use this technique for custom device stands, paper weights, table stands & displays and custom gift creations.

CNC Machining

The computer-controlled process enables repeatability and accuracy of design, making it ideal for producing multiple identical parts with tight tolerances. It can accommodate a wide range of shapes and sizes, including complex curves, recesses, angles, and geometric patterns.

3D Printing

3D printing technology has revolutionized the world of custom branding and gifting options.

By incorporating this technique into a gift or award design, we can create memorable gifting options that stand out from the crowd.

Materials | Recycled acrylic

At SAU we have our own line of recycled acrylic. It's made from our waste, re-cast and therefore very suitable to use into new acrylic tombstones, deal toys, awards and branding products.

Materials | Wood

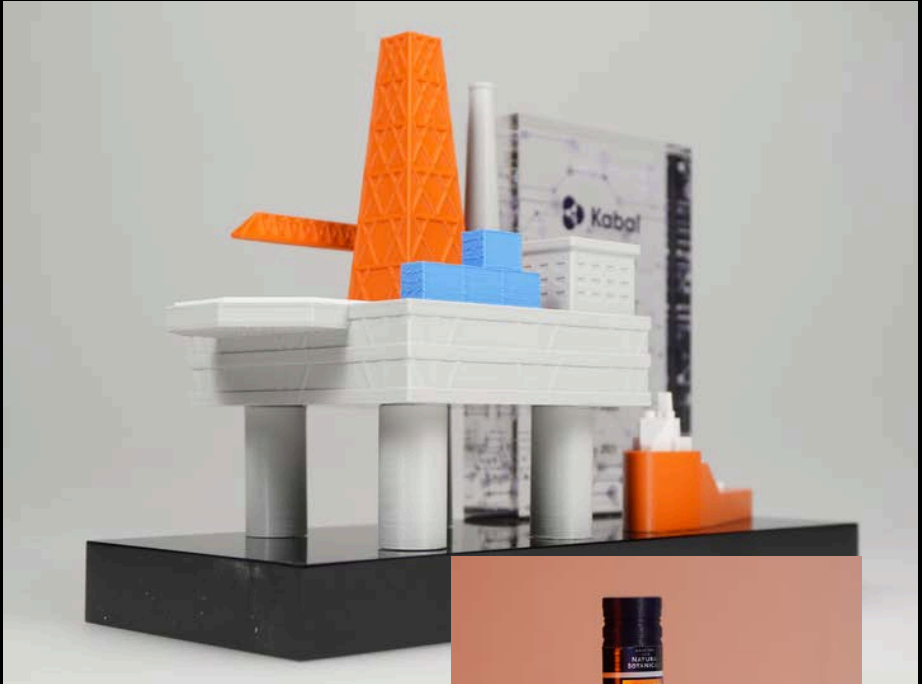

Wood is a very suitable material to use as a standalone award or gift or add-on such as a base. It can be printed and engraved on very easily and machined into different kind of shapes.

Materials | 3d prints

Made from biodegradable materials, they naturally decompose. SAU stays updated on the latest 3D printing developments, including recycled materials, to enhance our unique products.

Materials | Aluminium

Aluminum, a recyclable material, adds a luxurious touch to our gift production process. Its high-end appearance enhances the look of awards, gifts and branding products.

Benefits | Worldwide supplier

FULL SERVICE

At SAU, we ensure a stress-free, full-service experience from sale to delivery. Our in-house team assists with all inquiries, our design and production departments bring your vision to life, and our packaging team ensures careful delivery around the world.

GLOBAL COVERAGE

From our Amsterdam hub, we provide global coverage with expert packaging and fast dispatch. We ship financial tombstones, green deal toys, awards, and other acrylic castings worldwide daily.

BENEFITS

Benefits | Sustainable supplier

We pride ourselves on being a leading supplier in the market for sustainable products, made from our own line of recycled acrylic.
